

IP PBX Server

Designed for trixbox IP Telephony Application Platform

Server Features

45nm Intel® Atom platform

- Energy-efficient solution, designed for long time stable running.
- Supports DDR2 533 / 667 SDRAM up to 2 GB.
- Assembled by Intel Motherboard. Guaranteed quality.

Innovative industrial design

- Front LED indicators for system fault detection.
- Power cord hook to keep PSU power cord in place.
- Easy-to-maintain system fan and reusable filter design.

Specific design for IP Telephony Application Platform

- Wall mount and desktop capable. Easy to replace the existing telephone system.
- Powerful all-in-one voice + fax + data communication solution.

Companies around the world, from two-station law firms to mid-size corporations with hundreds of users, rely on trixbox CE-based systems to run their business.

Enjoying the benefits of Open Source IP PBX System Now!

IP PBX Highlights
